2025-26

**SRI SATHYA SAI ANNAPOORNA TRUST**

**Persistent Foundation**

**PERSISTENT INDIA FOUNDATION**

# EVERY CHILD MATTERS

Are we truly ensuring that every child receives what really matters?

In a country making great advancements, there are still several underserved regions where children go to school on an empty stomach. Over a decade ago, we recognised this critical yet overlooked need and launched the Morning Nutrition Programme in 2015 for school-going children because hunger should not hinder education.

While the programme now serves 1 Crore children across India, we recognise that much more remains to be done, and addressing such a mammoth task requires collective effort. With strong support from government collaborations and partners such as **Persistent India Foundation** under its CSR initiatives, the Trust continues to expand its reach and outcome.

This partnership reflects how corporate support and grassroots implementation can create meaningful and sustainable change—because every child matters. 🌱

**Team Members**

India is singularly blessed with a CSR Policy, which is succeeding in India as it is in the very ethos of the Indian ecosystem. It is not just a compliance but a commitment to a better future. Not just an expenditure, but it is empowering the nation with better strategies.

There are plenty of wonderful organisations in this country, working for causes and many work with the Annapoorna Trust as they find the right match with the ideas, philosophy, and implementation capacities.

Together, we can create a future where everybody is included and nobody is excluded, and especially make sure that every child has access to the basics of life, nutrition, education, and healthcare. We should grow equitably.

We cannot transform society alone, but together we can do anything. That is the power of collaboration. After all, “The World is one Family”.

**Sadguru Sri Madhusudan Sai**

# WHY MORNING HUNGER?

Morning Meal is deemed the most critical meal of the day and is often skipped by many children, especially in the rural and impoverished regions of India, due to the challenging family circumstances. The concept of Morning Nutrition emerged as a unique and relevant solution to address children attending school on an empty stomach.

## OUR VISION

**Our vision is simple yet profound –**  
“Let no child go to school hungry ever!”

While the initiative began in India, our vision extends beyond borders, embracing the belief that the whole world is one family, and that every child deserves the opportunity to learn without hunger.

Today, our work spans across 25 States and 4 Union Territories across India.

The programme provides a nutritious, fortified millet-based morning drink “SaiSure” to children in government schools, helping them start the day energised and ready to learn.

From remote rural villages to the high-altitude regions of Leh, the programme continues to reach children where support is needed most.

# OUR WORK

# SIP OF STRENGTH

## Benefits of Consuming SaiSure

## SaiSure and its Contents

SaiSure Multinutrient Health mix provides a blend of **energy, balanced carbohydrates and dietary fibre**, supporting sustained energy for children. This is also enriched with essential minerals such as calcium, iron, zinc, and iodine, along with key vitamins **A, B-complex, C, and D** to support growth, immunity, and overall health. The formulation contains **no added sugar and zero trans fat**, making it a healthy nutritional supplement.

## Fortification Process

SaiSure Nutritions LLP fortifies the Ragi Millet with essential vitamins and minerals through a standardised fortification process to enhance its nutritional value. This ensures the fortified mix provides balanced micronutrients that supports the growth, immunity, and overall health of children.

## Ragi from Tiptur farmers at MLP (Minimum Livelihood Price)

Tiptur in Karnataka is known for its excellent ragi farming. Sri Sathya Sai Annapoorna Trust sources ragi directly from nearby farmers in the region, ensuring steady support for the farming community while procuring nutritious grains at slightly higher than the Government usually pays, which is at MLP. The sourced ragi is then utilized in the Trust's nutrition program to deliver healthy morning nourishment to government school children.

**ANGANWADI-KARNATAKA**

# QUANTITATIVE OUTCOME ANALYSIS

This section presents a Quantitative outcome analysis of 6 months of the Program in Anganwadi Schools of Chikkaballapur District, Karnataka, supported by the Persistent India Foundation towards the SAM and MAM children.

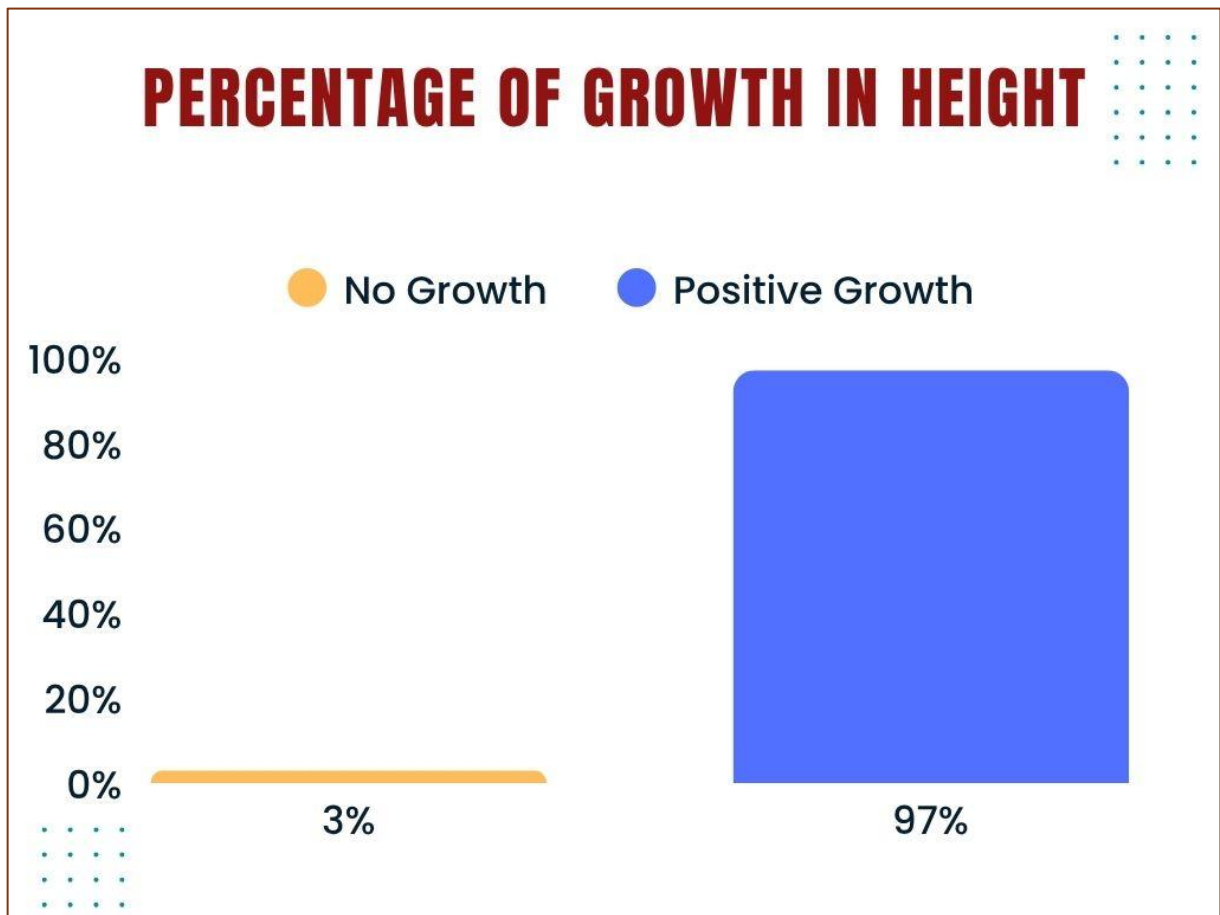

This evaluation was conducted using systematically collected baseline and endline data from 1500 Anganwadi children across 716 Anganwadi schools.

The analysis is based on measurements taken at the beginning and end of the Program, covering the following parameters:

- Height
- Weight
- Mid-Upper Arm Circumference (MUAC)

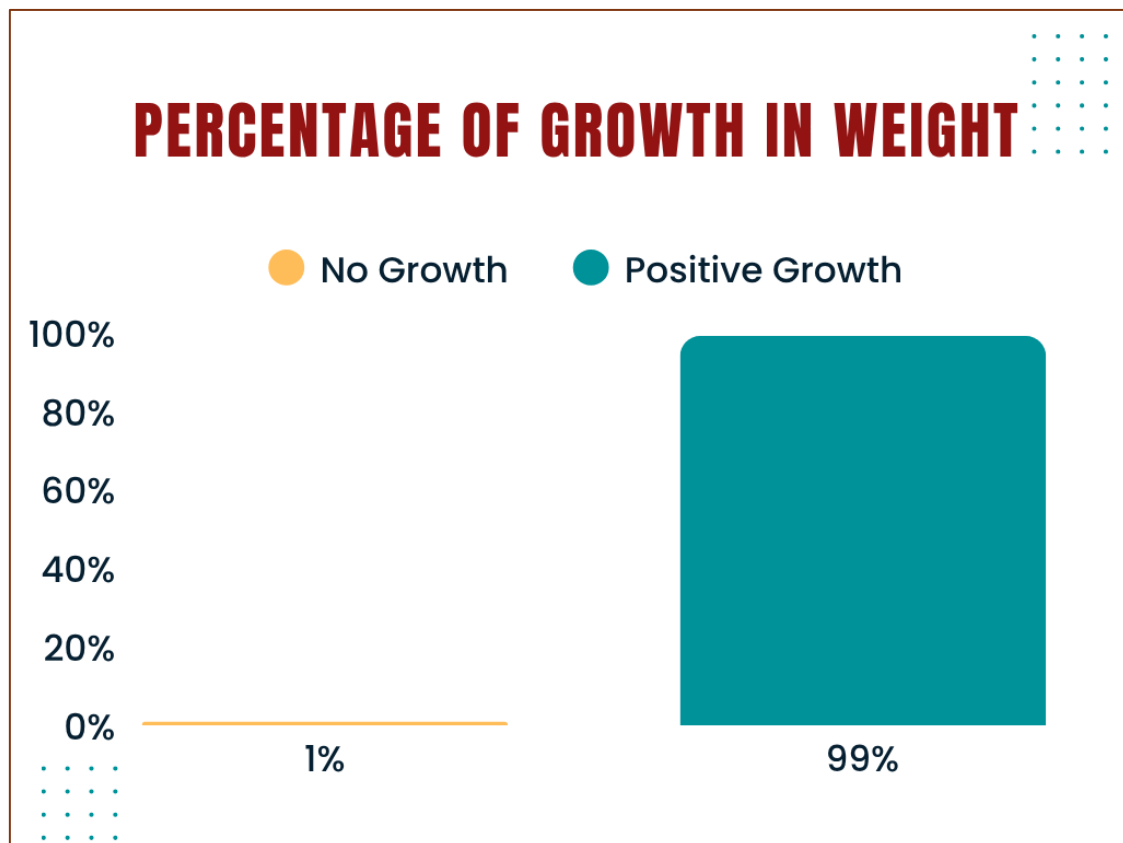

A detailed analysis of each parameter is provided below.

# ANALYSIS - HEIGHT

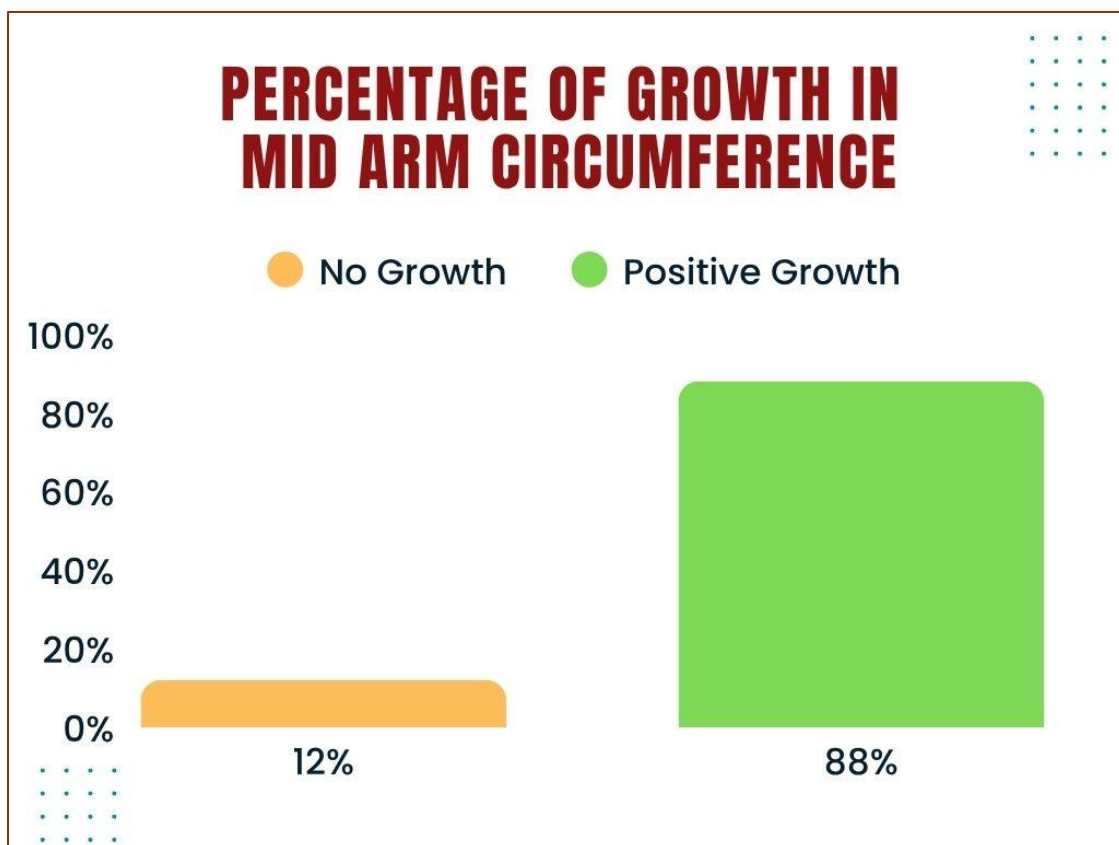

- Out of **1,500 Anganwadi children assessed, 1,452 students showed positive growth in Height**, reflecting a strong program outcome.
- These numbers translate to an outstanding **97% of children showing positive growth in height**.
- Such a high growth percentage signifies **sustained nutritional support and program efficiency**.
- The initiative is **contributing significantly to healthy growth patterns and reduced stunting risks**.

# ANALYSIS - WEIGHT

- Out of **1,500 students assessed, 1,492 students showed positive improvement in Weight**, reflecting a strong program outcome.
- An outstanding **99% of children showed positive growth in Weight**.
- The program aims to improve the overall growth in SAM and MAM children, particularly in terms of weight, and this intervention has shown positive outcomes.
- The initiative is contributing significantly to improved weight gain and better nutritional status among children.

## ANALYSIS – MID-ARM CIRCUMFRANCE

- Out of **1,500 students assessed**, **1,322 showed a positive** increase in Mid-Upper Arm Circumference (MUAC).
- This indicates a significant improvement in nutritional status among the children.
- **Overall, 88% of the children demonstrated positive growth in MUAC.**

Sri Damodar Balamandir**

## Summary:

Headmistress expressed gratitude to Persistent Foundation and Annapoorna Trust.

“Since the last 3 years our students are getting benefitted from SaiSure. SaiSure increases immunity in students. Also they fall less sick by this. Their concentration on studies has increased. I thank the Persistent Foundation for this noble cause.”

**Ms. Arati A  
Headmistress, GPS**

Date: 27/03/2026  
Report on Saisure chocolate drinks.

I the Headmistress of Govt. Primary School Chauli want to share my experience about Saisure chocolate and Milk drinks. From last three years, our students enjoying the Saisure drinks, which was very beneficial for the students. It helps to grow the immunity in students. Because of this drinks the infections of viruses and bacteria were very less and students can concentrate on their studies.

I am very much thankful to Annapurna trust for this noble cause which they are doing for our students health and for their better growth. Also thankful to Persistent foundation.

Thank you

From  
Arati A. Kolambkar  
Headmistress  
Govt. Primary School/  
Chauli Canacona  
Goa.

# **QUANTITATIVE ANALYSIS**

**SCHOOLS-GOA**

# QUANTITATIVE OUTCOME ANALYSIS

This section presents a Quantitative outcome analysis of the Program in Cancona and Ponda Taluk in Goa, supported by the Persistent India Foundation towards the govt. school children.

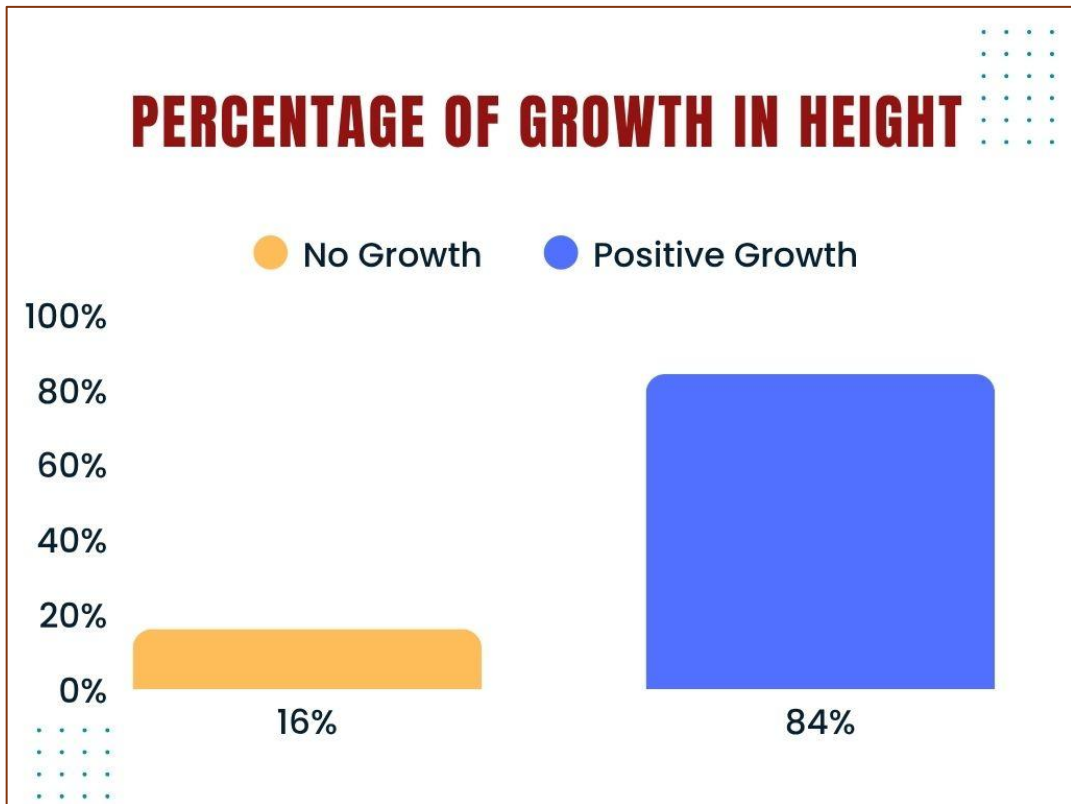

This evaluation was conducted using systematically collected baseline and endline data from 2450 school children.

The analysis is based on measurements taken at the beginning and end of the Program, covering the following parameters:

- Height
- Weight

A detailed analysis of each parameter is provided.

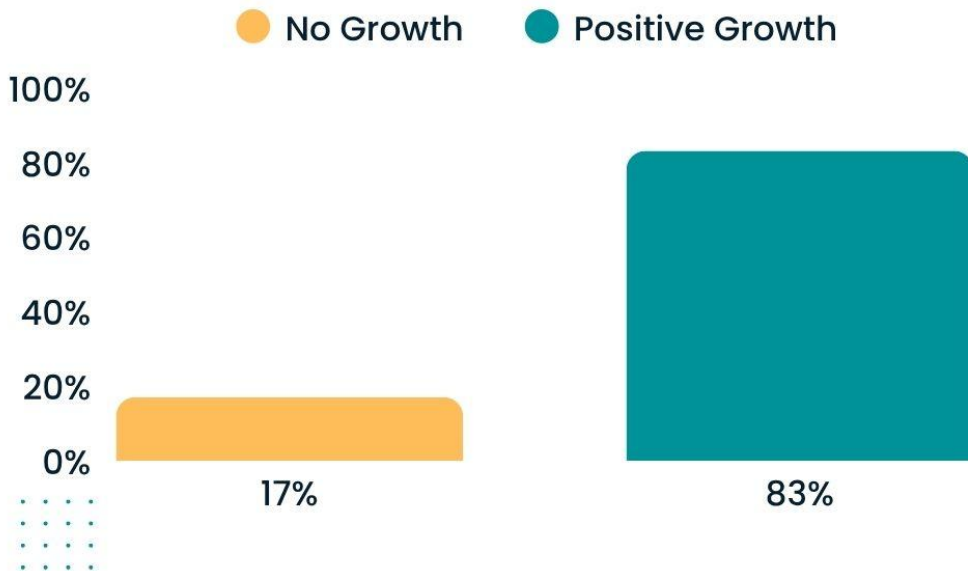

# ANALYSIS - HEIGHT

- Out of **2,450 students assessed, 2,065 students showed positive growth in Height**, reflecting strong program outcome.
- An outstanding **84% of children showed positive growth in height.**
- The data highlights **consistent improvement in physical development among children.**

# ANALYSIS - WEIGHT

## PERCENTAGE OF GROWTH IN WEIGHT

- Out of **2,450 students assessed, 2,036 students showed positive growth in Weight**, reflecting strong program outcome.
- An outstanding **83% of children showed positive growth in weight**, reflecting long-term nutritional outcome.
- Such high growth percentage signifies **sustained nutritional support and program efficiency**.

# PHOTOS OF THE Program Launch

The Launch of 'Morning Nutrition Program' in Goa, supported by **Persistent Foundation** and implemented by **Sri Sathya Sai Annapoorna Trust**.

Representatives from the organisation and partner teams were present at the school, reflecting strong on-ground collaboration. The initiative aimed to provide SaiSure, enhancing their daily Nutrition requirement, health and learning outcomes.

# CSR CIRCLE OF HONOUR

The CSR Circle of Honour was bestowed upon Persistent India Foundation for the extraordinary support to the Annapoorna Trust in the field of nutrition. Since 2021, the Foundation has been supporting the Annapoorna Trust in providing SaiSure nutrition to children across Karnataka and Goa.

Representing the organisation was Ms Chitra Byregowda (Senior Vice President and Global Head of ESG and Sustainability), who brings over two decades of global experience in driving meaningful and measurable change.

We sincerely thank Persistent India Foundation for their compassionate support in nurturing healthier lives and brighter futures.
